

It would be nice to have built in keyboard short cuts for hyperstacks. So as well as the current < > next/previous slice, next previous channel and frame would be useful

—

This functionality was added in version 1.42l:

Added keyboard shortcuts for hyperstacks:

&gt; - next channel

&lt; - previous channel

ctrl+&gt; - next slice

ctrl+&lt; - previous slice

alt+&gt; - next frame

alt+&lt; - previous frame
